

**The fun of the 70's.**

# Mini Trail 70H.<sup>TM</sup>

Family fun. Outdoor fun. Get-away-from-the-crowds-and-forget-your-troubles fun. That's the fun of the new Mini Trail 70H. It gets a lot of power from a small package—the single-cylinder overhead cam engine delivers 5 bhp @ 8,000 rpm. Packs in a car trunk—handlebars fold down, foot pegs fold up. Weighs just 143 lbs. And you can set it up in seconds when you reach the country. It's perfect for off-the-road riding. The little knobby tires roll over the roughest terrain. Soft contoured seat and rear shocks smooth the

bumps. And a great new hand clutch and four-speed transmission have been added specially for the men. Perfect for down-shifting when you need more power. Always gives maximum control. There are other great features, too. An extra large taillight. Sweptback, covered exhaust pipe. And a USDA-approved spark arrestor/muffler to help keep the wilderness quiet... and green. To top it off, there are bright new colors, lettering and racing stripes. Take a test ride... and find out how much fun it is to do your hiking on wheels.

**From Mighty to Mini,  
Honda has it all.**

Always ride safely. Wear a helmet and observe all rules of the road.
