All engines used are Tecumseh-Lauson engines except the 100 c.c. which is a Hodaka-designed 5-port engine with 5-speed transmission. On the 444 and 555 models the handlebars fold down completely.

ALL SEASON PONY BIKE

THE ULTIMATE TRAIL BIKE

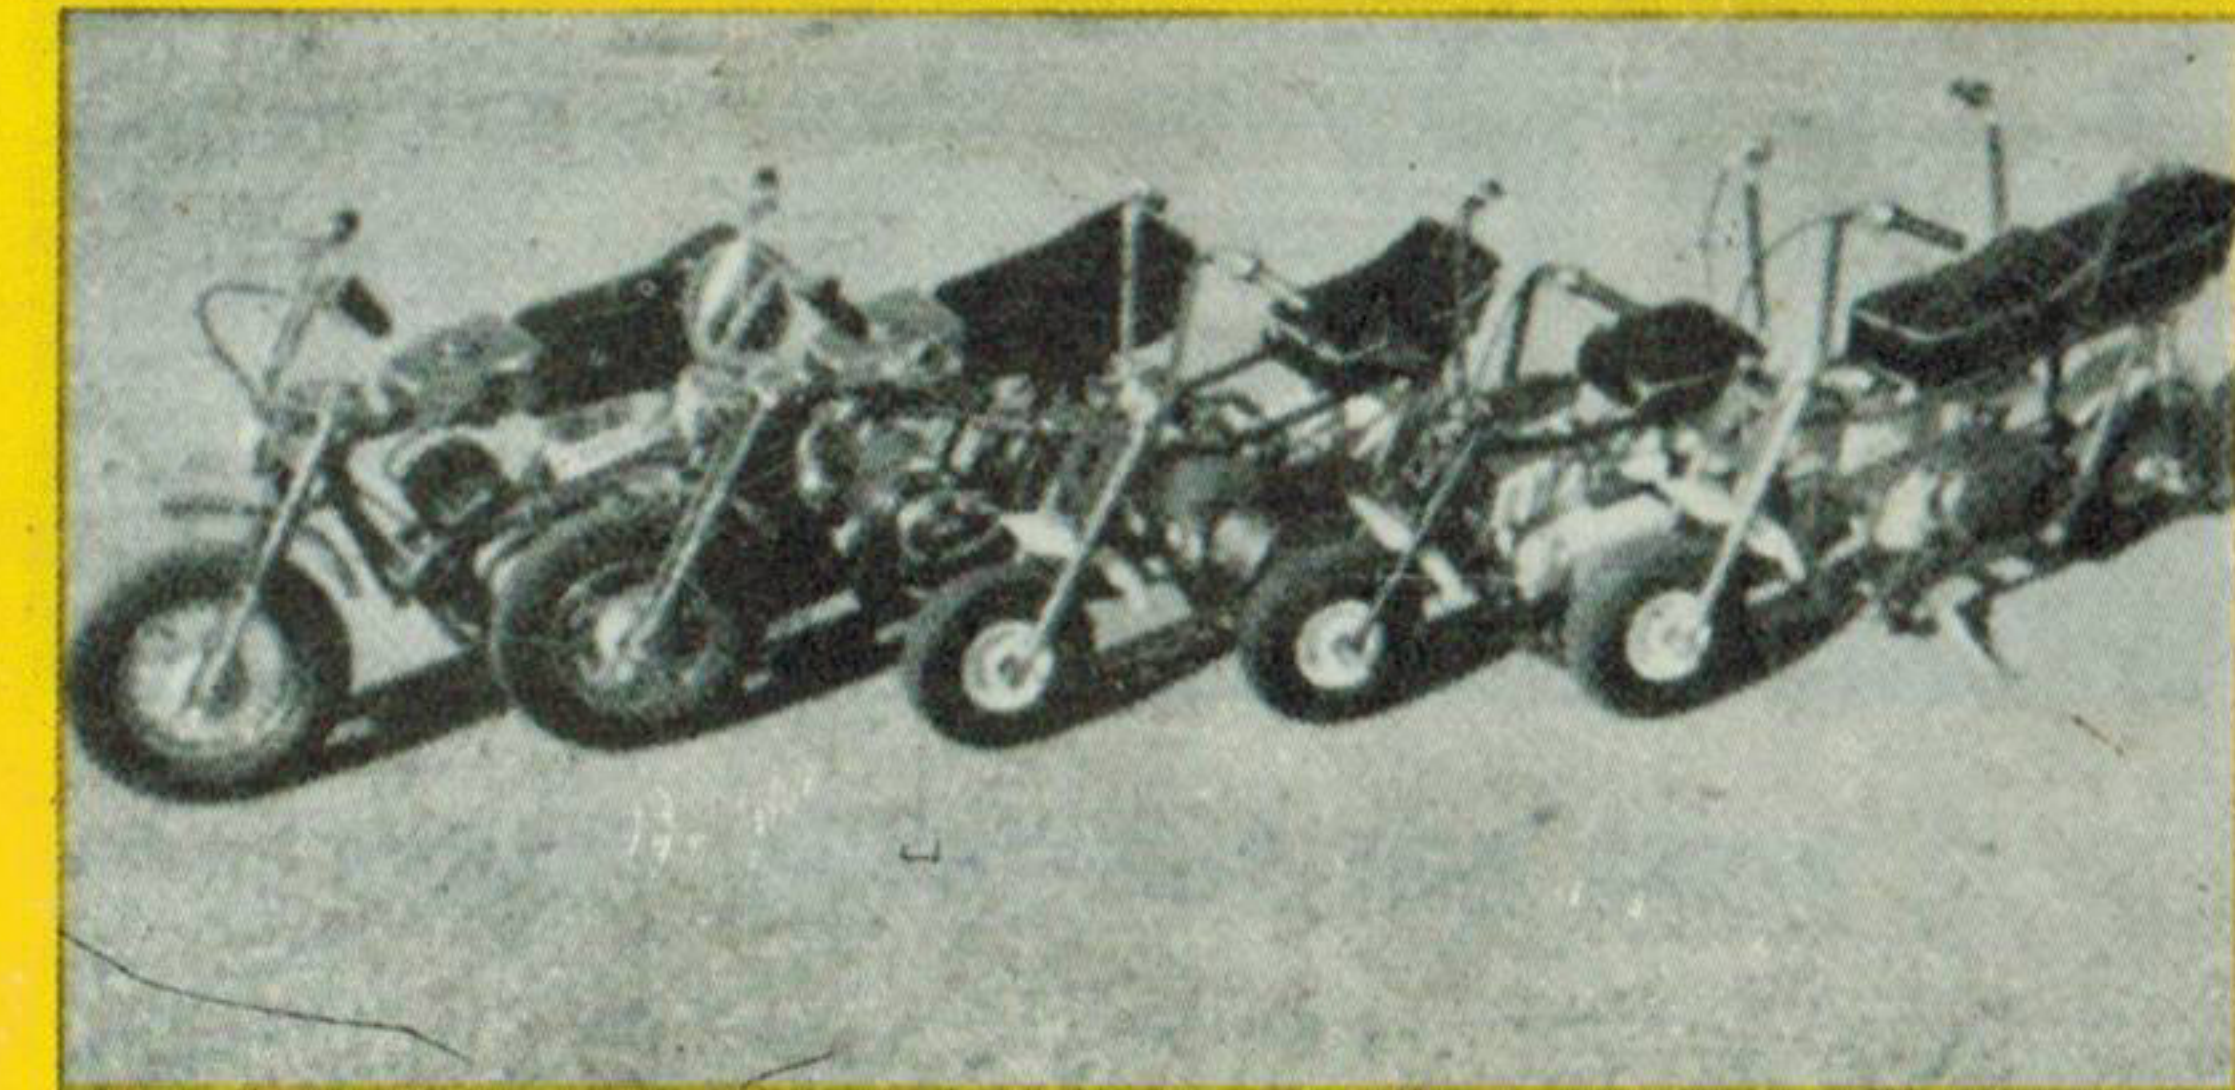

Will go any place wheels will roll! 21-12 x 8 extra low pressure tires. These tires are extra soft carrying only 1½ to 2 lbs. air pressure. They flatten out under the weight of the bike and rider providing a foot-print of approximately one square foot per tire. This might be compared to walking on snow with snow shoes.

HILL CLIMBING —

If you can hang on, the Floater can climb. The 5 H.P. engine with Torque Converter transmission supplies get up and go.

The Exciting New

PONY BIKES

FUN!

FOR THE ENTIRE FAMILY

Everything from Mini-Bikes for the trail and woods to the more powerful Mini-cycles for track and field use.
