

# For three-wheeled fun, try the light and lively **TRICUB™!**

Part beach buggy, part trail bike, part snowmobile, part all-terrain vehicle and all fun—that's the Tricub sports vehicle by SPD.

Here's your chance to get off the road in style. Whether you're the man about town, the debonair sport or the swingin' single, the Tricub will take you where you want to go, when you want to go.

Motorcycle-type controls—with twist-grip, self-releasing throttle and hand brake—make driving a breeze. There's no shifting. Jump on, and you're off and running. You ease down the lane; weave through the woods; nip up a hill or two; tip toe through the sand; splash across shallow streams; glide over light snow; and, in general, just cool it. The nimble, three-wheeled Tricub takes you where the action is—all year long.

Extra-big all-terrain vehicle tires give you a soft ride, and the bevel gear differential increases stability and helps you maneuver the Tricub in and out of tight spots.
